

# Emergency Services

- ✓ **80%** say they use VUE to **reduce risk** and **manage claims**.
- ✓ **80%** have been VUE customers for **6+ years**.
- ✓ **94%** say that because of VUE, incidents are managed **easily** and **quickly**.

“A **reliable** system, **easy to use**, with a large capacity disc recording (some claims come in from months ago).”

**Fire and Rescue Service**

“Service and product are **reliable**, staff are **knowledgeable**.”

**Ambulance Service**

“These cameras that we’ve got are more to support what we’ve seen when we go to **court**. There’s a lot of serious injury on the road, and a lot of it is caused through **negligence**.”

**Merseyside Police**

“Excellent system, we received replacement parts within a **couple of days**.”

**Ambulance Service**

“The cameras are **vital**, not just from a staff **safety** point of view but for passengers too. We also work very closely with the **Police**.”

**North East Ambulance Service**

90% of our Emergency Services customers have seen a **positive impact** from using VUEtech.

“Without a doubt, VUE equipment **lowers claim costs** and increases the **efficiency** of the claims handling process. I pushed to get vehicle cameras for our fleet as I knew the benefits and **Return On Investment** that VUE’s Video Telematics equipment would provide, and have been **really pleased with the results.**”

John Lowden  
NHS Blood and Transplant

The **NHS Blood and Transplant** fleet consists of 337 vehicles in total, with 290 vehicles (86%) fitted with Video Telematics.
