of our Emergency Customers have seen a positive impact from using VUEtech

80%

say they use VUE to reduce risk and manage claims

•: VUE

data taken from 20 emergency services customers answering our 2020 survey

**86% of the  
NHS Blood &  
Transport fleet is  
fitted with Video  
Telematics**

"A **reliable** system, **easy to use**, with a large capacity disc recording (some claims come in from months ago)."

**Fire and Rescue Service**

"Service and product are **reliable**, staff are **knowledgeable**"

**Ambulance Service**

"The cameras are **vital**, not just from a staff **safety** point of view but for passengers too. We also work very closely with the Police"

**North East Ambulance Service**

"**Excellent system**, we received replacement parts within a **couple of days**"

**Ambulance Service**

"These cameras that we've got are more to support what we've seen when we go to **court**. There's a lot of serious injury on the road, and a lot of it is cause through **negligence**"

**Merseyside Police**

"Without a doubt, VUE equipment **lowers claim costs** and increases the **efficiency** of the claims handling process. I pushed to get vehicle cameras for our fleet as I knew the benefits and the **return on investment** that VUE's Video Telematics equipment would provide, and have been **really pleased with the results.**"

**John Lowden NHS Blood and Transplant**
